CIENTÍFICAS

JOB VACANCIES AT IFCA

The Spanish National Research Council (CSIC) is the largest public research body in Spain with centres throughout the country, plays an active role in the scientific policy of all the country and autonomous regions (see <http://www.csic.es>). As a multidisciplinary body it covers all fields of knowledge, from basic research through to advanced technological development.

In this context **CSIC offers several job appointments to work at IFCA in development, setup and applications environment for Grid infrastructures dedicated to scientific computing.**

The contracts have an initial duration of two-three years. The possibility of a longer term engagement will be afterwards analyzed with the individual applicants in view of their area of interest and profile. The income will be negotiated with the individual candidate depending on experience and background.

The candidate must hold a degree in a scientific discipline or engineering (Telecommunications or Informatics). Applicants with background in scientific computing, visualization, advanced knowledge on Linux operating system or virtualization techniques will be preferred.

Depending on the case, it is possible and foreseeable that the work done leads to a project to be presented towards a PhD. in Physics or Computer Science. The starting date should be between July 1st and September the 1st of 2008.

Applications are to be submitted by e-mail, FAX, or Post the following address:

*Jesús Marco de Lucas,
Instituto de Física de Cantabria,
Edificio Juan Jordá,
Avda. De los Castros s/n, 39005 Santander
FAX: ++34 942 200935
E-mail: marco@ifca.unican.es CC: iscampos@ifca.unican.es*

Deadline for applications is June 30th
